DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-6 and 8-22 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-6 and 13-20 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent¹ and recent Federal Circuit decisions² indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. For example, the steps of "performing", "thresholding" and identifying" of claim 1 are not tied to any particular apparatus/component, therefore

¹ *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876).

² *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008).

do not qualify as a statutory process. Similarly, claims 13 and 17 do not qualify as statutory processes.

Allowable Subject Matter

3. Claims 8-12, 21 and 22 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 8, the prior art, taken either singly or in combination, does not teach:

- a fusion module configured to perform at least one of integrating the image data across a plurality of time frames and integrating a plurality of images in a single time frame.

Regarding claims 9-12, since these claims depend from claim 8, they are also allowable for the same reason.

Regarding claim 21, the prior art, taken either singly or in combination, does not teach:

- spatial processing means for fusing the temporally integrated sensor data from said temporal processing means, wherein said spatial processing means detects the target from the spatially fused data and provides an indication corresponding to the detected target.

Regarding claim 22, since this claim depends from claim 21, it is also allowable for the same reason.
